

PYAE PHYO WIN

Full Stack Developer

Contact

Phone

09-956391476

Email

pyaephyowin706@gmail.com

Address

NO (10) A, BO TAYZA STREET, BO HTUN SAN
WARD, DAWBON TOWNSHIP, YANGON

Education

Final Year (B.Sc Hons Computing)

University of Greenwich (UK)
Completed (Expecting to be awarded Degree)

Level 5 Diploma in Computing

KMD Institute
Awarded in October 2024

Level 4 Diploma in Computing

KMD Institute
Awarded in 27 October 2023

Certifications

- Programming Basic Course (Fairway)
- Professional Web Developer (Fairway)

Skills

• Technical Skills

• HTML, CSS, PHP (Laravel), Bootstrap
CSS, Tailwind CSS, C#, JavaScript,
TypeScript, Python, Vue, Basic knowledge
of Java, React, React Native, Kotlin

• Soft Skills

- Analysis and research skills
- Communication and teamwork

• Language Skills

- Burmese (Native)
- English (Intermediate)

Portfolio Website - Inprogress

Projects Experience

Social Media Campaign

2023

- Conceptualized, created, and managed a complementary social media campaign to promote the launch.
- Utilized platforms such as Facebook, Instagram, and LinkedIn for targeted outreach, increasing engagement and visibility.

Medicare E-commerce Store:

2024

- Designed and implemented a secure, responsive online store with features including product listings, shopping cart, checkout, user registration, and order tracking.

ThinkSpace

2025

- Implemented API for Comments, Views, Statistical Chart and User Block, Hide.

M-Hike (Mobile App - Native & Hybrid)

2025

- Developed an offline app with local storage (SQLite). Features - plan hikes, manage observations, take voice notes and take photos.

Tun Rice Milling System

2025

- Developed a web-based system to manage appointments, paddy drying, milling output calculation (based on moisture content), and inventory control. The system improves operational efficiency, accuracy, and production monitoring in rice mill operations.

Work Experience

AI MODEL DEVELOPER & TRAINER

MY DAY THU KYWAL

2024

- Designed and implemented custom machine learning models using frameworks like TensorFlow, PyTorch, and scikit-learn.
- Trained deep neural networks for tasks such as classification and object detection.
- Applied transfer learning and fine-tuning techniques on pre-trained models (e.g., BERT, GPT, YOLO, ResNet) for domain-specific tasks.
- Collected, cleaned, and annotated large datasets from various sources.

JUNIOR PROGRAMMER

THETYS Co., Ltd.

2025

Present

- Backend: C# (.NET), Hangfire, MSSQL— REST API development, background jobs, scheduled tasks, database operations, stored procedures, OpenAI integrations.
- Frontend: Vue.js, React, TypeScript, shadcn/ui, VueFlow, Pinia — building responsive UIs, reusable components, flow-based interfaces, state management
- Data & APIs: Axios, TanStack Query — API integration, data fetching, caching, and synchronization
- Testing: Postman, k6, Playwright— API validation, performance/load testing, end-to-end testing
